

Deval Kotak

 Mumbai  devalktk@gmail.com  +918169795099  devalkotak  Deval Kotak  devalkotak

Motivated and versatile engineering student with a strong blend of **analytical skills** and **leadership potential**. Experienced in leveraging **Python** and **automation** to develop innovative technical solutions, while simultaneously demonstrating strong **communication** and **team management** abilities through organizational roles. A **self-starter** committed to academic excellence and practical application, seeking to contribute to a forward-thinking team with creativity and diligence

EDUCATION

B.Tech in Computer Science and Engineering (IoT, Cybersecurity and Blockchain Technology),
Dwarkadas J. Sanghvi College of Engineering (Currently Pursuing)

PROFESSIONAL EXPERIENCE

Cybersecurity Intern, JioStar

Feb 2026 – Present

- **Conducted** real world pentests in production and deployment environments
- **Built** a AI based Automated Regression Engine to work on infinite endpoints and with a no-code approach to add test cases.
- **Created** multiple slack bots with complex workflows to assist in day to day operations
- **Building** a AI backed SIEM Triage pipeline to add summary based on previous alerts and suggest fine tuning to real time alerts via Slack.
- **Assisted** in developing LLM based CI/CD pipeline check for new and existed code

Vice President, DJS ISACA

Jul 2024 – Aug 2025

- **Designed** and **deployed** web exploitation and cryptography challenges for "Breachbytes 2.0," a Capture The Flag (CTF) event, simulating real-world OWASP Top 10 vulnerabilities for 80+ participants.
- **Conducted** hands-on sessions on Ethical Hacking and Network Security, **mentoring** 80+ students on the practical use of tools like Wireshark and Burp Suite.
- **Oversaw** the technical infrastructure for "SYN3ERGY 2.0" (24-hour hackathon), ensuring secure API integrations and network stability for competing teams.

Chairperson, DJS INNOVEX

Oct 2025 – Present

- **Pioneered** and **launched** a new interdisciplinary organization to bridge the gap between academic theory and real-world application.
- **Designed** the organizational framework and **recruited** a 30+ member core team to manage operations across 9 specialized technical domains, including AI/ML, Fintech, and Cybersecurity.
- **Directed** the strategy for member development programs, including interactive workshops, intensive bootcamps, and buildathons to cultivate a continuous learning culture.

Co-Chairperson, DJS Trinity

Aug 2024 – Apr 2025

- **Directed** end-to-end project management for a 3-day college festival; managed a 100-person team, led complex logistics, and oversaw the comprehensive budget
- **Managed** a 100-person team and oversaw all critical operational areas, including comprehensive budgeting, complex logistics, venue production, high-volume crowd management (1000+ attendees per night), security, and police permissions.
- **Spearheaded** new event initiatives, including a national-level drone race, by coordinating with external vendors, security, and publicity teams to ensure successful execution

Notion and Productivity Consultant, Freelance

Sep 2020 – 2024

- **Consulted** for 15+ clients to analyze workflow pain points, design custom-tailored project management systems, and optimize team efficiency
- **Optimized** workflows and increased team efficiency using comprehensive project management tools and integrating various productivity principles into their systems and workspaces.

Co-Founder, Optiverse (Student Run Non-Profit Org.)

Mar 2021 – present

- **Developed** strategy and directed operations for a 250+ member global organization across 19 countries, leading to an 8% acceptance rate for key internship programs.
- **Directed** the development and execution of 90+ educational workshops (50-250 participants) and two 2-month internship programs (8% acceptance rate), significantly enhancing educational outreach and talent development for students aged 11-17.
- **Partnered** with NGOs (e.g., Lakshya, Lotus Petal Foundations) which secured external recognition from organizations like Lady Gaga's "Born This Way" Foundation.

Algorithmic Trading, Freelance

Mar 2025 – present

- **Analyzed** market data to **design** and **backtest** quantitative trading strategies using PineScript and Python
- **Developed** automated algorithmic trading strategies and backtesting using Python
- **Engineered** an automated trading system by integrating data analysis libraries with multiple broker APIs (e.g. Dhan, IBKR, Alpaca) to **manage real-time execution** and **mitigate risk**
- Expanding expertise by implementing and optimizing strategies across multiple **brokerage APIs** (like IBKR, Alpaca, Fyers, Dhan, Upstox & more).

Vice President, DJS ISACA

Jul 2024 – Aug 2025

- **Led** and planned "SYN3ERGY 2.0", an intercollege 24-hour hackathon while collaborating with multiple other committees from our college.
- **Conducted** an intercollege "Breachbytes 2.0", a single-day CTF event.
- **Led** multiple offline and online workshops and seminars with an average attendance of 80 in each. Also conducted co-committee interviews with over 80+ applicants.

Cybersecurity Mentor, DJS Buildspace

Aug 2024 – present

- **Led** a team of 12 mentors and designed curriculums including tasks for mentees in ML, Web3, Full Stack, CyberSec, and other similar domains.
- **Conducted** multiple seminars on the same domains for FY and SY students with an average attendance of 75.

Publicity Head of Department, DJSCE eXpress	Nov 2023 – Nov 2024
• Led a team to shoot & edit multiple reels which have garnered 60k+ views & secured 200+ offline registrations for multiple events. • Managed 200+ participants in offline events while ensuring smooth operations of the event flow.	
Events, Media, Publicity and Sports Co-Com, DJS Trinity	Jan 2024 – May 2024
• Organized, assisted and hosted multiple cultural, tech, sports events • Co-ordinated with 50+ member team to ensure smooth flow of our college fest • Directed & edited various reels & videos and also conducted offline publicity	
Marketing & Creatives Co-Com, DJS ISACA	Aug 2023 – Jun 2024
• Secured sponsors and built partnerships for events while producing professional content for Instagram. • Co-ordinated and assisted in an 24-hour intercollege hackathon with 150+ participants.	
Creatives Co-Com & Artist, DJS BEATS	Nov 2023 – Apr 2024
• Created and edited photo and video content for Instagram, including musical overlays and beat syncing, and recorded multiple covers and medleys. • Assisted in multiple events for management and tech (music) support.	
Machine Learning Mentee, DJS Buildspace	Oct 2023 – Jul 2024
• Grasped the fundamentals of machine learning and worked on a project with other mentees	
Publicity Co-Com, DJS IETE ISF	Oct 2023 – Apr 2024
• Conducted online and offline publicity for multiple event which included magazines, intercollege competitions and seminars. • Co-ordinated and assisted in an 24-hour intercollege hardware hackathon with 100+ participants.	
Video and Production, TEDxDJSCE	Mar 2024 – Apr 2024

SKILLS

CyberSecurity & Tools

- **Executed** web application vulnerability assessments using **Burp Suite** and **Metasploit**, adhering to **OWASP Top 10** standards to identify and document critical security flaws.
- **Engineered** custom security tools using **Python** and **Bash**, including a **Port Scanner**, **Firewall** and **Custom Ciphers**, demonstrating proficiency in automating security workflows and cryptographic logic.
- **Developed** a **System Log Analyzer** and **Malware Scanner** script to automate the parsing of multiple logs and detect file-based threats on **Linux** environments.
- **Analyzed** network traffic patterns and performed packet-level inspection using **Wireshark** and **Nmap** to map network topology and detect anomalies.
- **Solved** challenges in various **CTF competitions** (like AnveshamCTF, BreachBytes, CSAW, CTF-SPCS, CrewCTF, Pragyan by NIT and more) applying theoretical security concepts to practical exploitation scenarios.
- **Simulated** real-world attack vectors by developing a **File Integrity Manager** and **Packet Sniffer** to test user awareness and understand network data leakage risks.
- Practiced multiple labs on PortSwigger, TryHackMe, HackTheBox, PicoCTF, OverTheWire, DVWA, OWASP JuiceShop

Data Analysis and Engineering

- **Engineered** robust data pipelines by leveraging Python libraries (e.g., Pandas, NumPy) and advanced SQL to efficiently extract, clean, and transform large datasets for analysis & **automating** data cleaning processes to **enable** complex analysis
- **Analyzed** complex datasets using advanced Excel functions, PivotTables, and statistical methods to uncover critical trends and generate actionable insights.
- **Translated** raw data into compelling visual narratives (e.g., Tableau, Excel) to **communicate actionable insights** to both technical and non-technical stakeholders.

Algorithmic Trading

- **Analyzed** market data to **design** and **backtest** quantitative trading strategies using PineScript and Python.
- **Optimized** financial strategies across multiple **brokerage APIs** (including IBKR, Alpaca, Fyers, and Dhan) to enhance execution efficiency and risk management.
- **Leveraged** data analysis libraries to uncover market trends and validate statistical models for real-time trade decision-making.

COURSES

Python for Finance and Algorithmic Trading, FessorPro	Apr 2025
Data Analysis with Python, FreeCodeCamp	Jul 2025
Google Project Management: Professional Certificate, Coursera	May 2021

AWARDS

- 3rd Place, Google Winter of Code (2023) : Business Proposal Competition and Ideathon, DJS GDSC (presently GDG)**
- 3rd Place, Plannerd 3.0: Case Study Analysis and Ideathon, DJS ECell**
